

Patients and Friends:

I am very sad to learn that Dr. Hursey has had to move back to South Carolina to care for her own family. I will be taking over the care of her practice effective immediately. In order to make the transfer smooth, without interference of patient care, I started to work in this clinic since January of this year and have already had the opportunity to meet and care for some of Dr. Hursey's existing patients. I feel comfortable and very much honored to take over the responsibility of their care. Dr. Hursey has done a fantastic job and I will certainly do my best to continue to do so.

I would like to take this opportunity to introduce myself briefly. I graduated from Nanjing University School of Medicine in China with honors in 1995. I continued my medical education and training at Louisiana State University Medical Center of New Orleans from 1995 to 1998. I did research that was published about Gastroesophageal reflux disease (GERD) at Tulane University Medical Center from 1998 to 2001. After that, I completed residency training in Internal Medicine at the University of Pittsburgh Medical Center from 2001 to 2004. I was board certified in Internal Medicine in 2004. I moved to Dallas at the end of 2004 and started to work as a hospitalist mainly at Presbyterian Hospital of Plano.

I have been working extensively with patients in very serious condition, which require hospitalization. I will personally follow existing patients at Presbyterian Hospital of Plano when necessary. Also, I will continue following patients at Integra Rehab Hospital and at Prestonwood Rehab and Nursing Facility if needed. In that way, the patient care would not be interrupted. In the office, I will work with my patients as a team to keep them away from hospital. I emphasize preventive medicine.

I am married to Yangsuk and have two children Geena (9 years) and Ian (4 years), who are the center of my life. I believe in Christ and am a devoted member of Binnerri Presbyterian Church in Richardson.

I am implementing electronic medical record in the office to increase the efficiency of patient care and communication. The office location and phone number will not change. Your feedback is very welcomed to improve our practice.

On the whole, you and your family are very welcomed to stay with our new practice and I look forward to meeting you and caring for you in the future.

Sincerely Yours

Paul Hui Wang, MD
